MINUTES
WORKSESSION and SPECIAL MEETING

BASEHOR CITY COUNCIL
October 6, 1997
7:00 P.M
Basehor City Hall

Officials Present: **Mayor Pfannenstiel, Pres. Robert Vervaecke, Joseph Odle (arrived at 7:15 p.m), Charles Wilderson (arrived at 8:45 p.m), Victor Ziegler and Burl Gratny**

Others Present: **Mary Mogle, CMC** **Bill Mogle, City Supt.** **John Tillman, Graue-Hewitt**
City Engineer Staff: **Cecil & Brian Kingsley, Pat Cox, Chad Thompson and David Hamby**

WORKSESSION

This worksession will be the first in a series of meetings for the purpose of hearing from various wastewater treatment facility suppliers, reported engineer Cecil Kingsley. A brief overview of plants and types that will be presented for Council consideration was given.

Engineer Pat Cox, gave a synopsis of the purpose of an oxidation ditch and it's cost effectiveness. At this time, Mr. Cox introduced John Tillman of Graut-Hewitt. Mr. Tillman sells the Eimco Carrousel System which is a method of treatment that accelerates the activated sludge and will not require expensive blowers. This process also will meet all EPA and KDHE ammonia and treatment standards.

The Carrousel System is a low maintenance, operator friendly system that consists of vertically mounted, low speed surface aerators in a concrete basin that uses partitions to create a continuous channel. Aerated pumping action helps to maintain the suspension of "mixed liquor" in the channels. From their it is pumped upstream to the aeration zone where it is completely mixed and forced to the downstream channel. This system can be designed for easy expansion to handle any future growth. Mr. Tillman went on to explain a scope of services his company will provide during and after the project is completed. Council expressed concerns of possible odor and proper disposal of sludge. Mr. Tillman noted unless the facility is not running properly, there should not be any odor. All sludge will be handled in an enclosed building. He also reported there are three methods to disposing of the sludge 1) install gravity built thickeners, 2) incinerator, and 3) monofill containment storage and then land apply.

Council having no further questions at this time, Mr. Cox suggested scheduling the other worksessions. Council agreed to meet with two suppliers on October 27th and the fourth supplier on November 3rd (Councilman Vervaecke will be unable to attend). The engineers suggested once the Board has listened to all presentations they can choose which types of plants they would like to visit and then arrangements will be made for on-site tours.

SCANNED
2-28-07 ct

Mayor Pfannenstiel announced the worksession will now close and the Council will meet in a special meeting regarding the allocation of funds for repair of existing sidewalks.

An estimate of material and equipment costs were submitted by the city superintendent, Bill Mogle. Mr. Mogle explained the costs include the rental of a dump truck to assist with hauling off the sidewalk debris. Mayor Pfannenstiel reported the estimate is for the repair of over seven hundred linear feet of sidewalk from Leavenworth Road east to 155th Street then south to the library. The Mayor noted the costs provided is for materials only with labor being provided by Lansing Correctional Facility inmate work crew. Old debris will be stored at the north lagoon and used to fill in the north lagoon when it is abandoned.

Engineer, Cecil Kingsley, announced he would like to see the 3 ft. sidewalks be replaced with a minimum width of 4-6 feet. Mayor Pfannenstiel stated since the entire sidewalks were not being replaced and certain right-of-way restraints, the City would not be able to make the change at this time. However, the City is also hoping to use the inmate crew to build a new sidewalk from Leavenworth Road north to Poplar Street and will look into increasing the width at that time.

J. Odle moved to allocate up to $4,000.00 for sidewalk repairs as presented. B. Gratny second the motion. All Aye. Motion Carried 5-0.

There being no further business to discuss, R. Vervaecke moved to adjourn the meeting. C. Wilderson second the motion. All Aye. Motion Carried 5-0. Meeting adjourned at 9:00 p.m.

Submitted for Council approval with/without corrections this 20th day of October, 1997.
